

Prohibited Parking on the North West (NW) Barge***Prohibited Parking on the North West (NW) Barge***

Due to a recent extreme weather event, which resulted in seawater ingress into ballast tanks on the NW barge an additional parking restriction has had to be introduced on the facility. This restriction is to allow safe access to ballast tanks for the FIPASS Maintenance Team, if called upon to carryout ballasting operations at short notice in the event of future seawater ingress.

The blue shaded area can still be used for loading and unloading only, but **parking for any duration is prohibited at anytime.**

Vehicle parking is still encouraged within the warehouses (South East & Centre) in the first instance, followed by the designated parking areas on the North East Barge. The Duty Operations Mnager can be contacted on 22636 or emailed at fipass@atlink.co.fk if you require any further direction with regards parking on the facility.

Atlink appoligise for any additional inconvenience this restriction may cause, however it's been driven by a safe system of work.

This Notice shall remain in force until further notice and is in addition to Safety Notice No 32 (FIPASS Parking), issued on the 15 February 2024.
